WORK EXPERIENCE

Python Developer

Crest Data Systems - Ahmedabad, Gujarat
August 2019 to April 2020

Crest Data Systems

• Splunk Core QA Automation:

The project was from Splunk Inc. When they were migrating from Python2 to Python3. My work there was to check the automation files for Splunk internal commands and also to make new automation test cases for the missing ones. I had gained great experience with debugging skills and also with test cases in Python.

• Netskope App for Splunk:

The project was from an American Software Company named Netskope that provides computer security platform. I was working with the team to make Splunk App and Add-on for Netskope. I was a part of the team to code for data collection through API from Netskope, store the data, and also to visualize the data in Splunk Dashboards. We used Python, XML, and JavaScript to complete the project.

• Jira Add-on for Splunk

I made Jira Add-on for Splunk as a part of my final year project at University. It was an Add-on along with App for dashboards. It collected data from the Jira server and display the data as charts in the dashboards.

EDUCATION

Bachelor's in Computer Engineering

Gujarat Technological University - Ahmedabad, Gujarat
May 2016 to Present

SKILLS / IT SKILLS

- **Python (1 year)**
- **Django (1 year)**
- **Flask (1 year)**
- **React JS (learning) (Less than 1 year)**
- **Node JS (learning) (Less than 1 year)**
- **Html5 (1 year)**
- **Css (1 year)**
- **Javascript (Less than 1 year)**
- **Data Science (learning) (Less than 1 year)**
- **Machine Learning (learning) (Less than 1 year)**
- **Image Processing (learning) (Less than 1 year)**

CERTIFICATIONS AND LICENSES

JPMorgan Chase & Co. Software Engineering Virtual Experience

May 2020 to Present

It was a great experience to be a part of JPMorgan Chase & Co. "Software Engineering Virtual Internship". I learned a lot like frontend web development and data visualization with "perspective", a personalized software by JPMorgan Chase & Co.

Google IT Automation with Python

May 2020 to Present

MyCaptain Web Development Workshop

June 2019 to Present

ⓘ

ADDITIONAL INFORMATION

• I'm proficient in Python Programming Language and to cope up with the trend, I'm trying to learn React JS and Node JS.
• I'm a Machine Learning enthusiast and currently learning ML and Data Science.
• I'm also trying to learn Image Processing using OpenCV and other Python tools.
